

SDDM series**Features**

This machine is special for processing cylindrical work piece, the machine can drilling and boring work piece. The drilling type adopt BTA type, the guide carriage supply oil and remove the chips from drilling bar to chips device, when the machine boring work piece, the guide carriage supply oil and remove the chips to chips device

Technical specifications

Specifications:	SDDM2150	SDDM2163	SDDM2110
Max. boring diameter	500mm	630mm	1000mm
Max. work piece weight	15T	20T	30T
Max. diameter of work piece	-	-	-
Max. diameter of solid drilling in one stroke	35~150mm	150mm	150mm
Max. depth of drilling and boring	10/15m	10/15m	15/20m

Standard accessories

- 1) Integrated control panel
- 2) Screw rack from Taiwan
- 3) Drill bar box
- 4) 380v/50hz/3ph
- 5) Tool kit
- 6) Instruction manual books
